|-------------------|--------------------------------------|---|

Organic Practices

- Eliminate Chemical Pesticides

Part 2: Open Space Specific Characteristics:**Wildlife and Plant Inventory Documentation**

- [PlantList-DFW.pdf](#)
- [Wildlife-Info.pdf](#)

Please describe any notable parcels of open space or features of your open space - i.e. - a wash or river running through the property or a wetland / birding area.

The east portion of the property was preserved as open space and left in its natural state. There is a soil conservation pond at the north end just off our property and a seasonal creek that runs north to south from the pond.

What wildlife and native plants do you most frequently find in your community now? (NOTE - this is anecdotal, does not have to be a scientific study or exhaustive list)

We have seen Bobcats, Coyotes, Squirrels, Skunks, Armadillos, Snakes and many variety of birds

Are any herbicides, pesticides or chemicals of any kind used in your open space parcels?

No

Does your community currently have a management plan for the open space in the community

No

Does your community currently have a process in place to ensure that the open space will continue to be managed as open space once Taylor Morrison turns ownership over to an HOA?

Yes
