| • Limit Water Use | • Drip or Soaker Hose for Irrigation | • Reduce or Eliminate Lawn |
|-------------------|--------------------------------------|----------------------------|

Organic Practices

- Eliminate Chemical Pesticides

Part 2: Open Space Specific Characteristics:**Wildlife and Plant Inventory Documentation**

- [Angel-Field-East-Tree-Survey.pdf](#)
- [SDAL_21020311550.pdf](#)

Please describe any notable parcels of open space or features of your open space - i.e. - a wash or river

running through the property or a wetland / birding area.

Angel Field East is adjacent to a conservation easement and Waters Creek. Throughout the community, we have linked open spaces to the conservatory.

What wildlife and native plants do you most frequently find in your community now? (NOTE - this is anecdotal, does not have to be a scientific study or exhaustive list)

Various species of wildlife and birds are seen along the creek. Bur oak is one of the tree species planted in the open space along the trail.

Are any herbicides, pesticides or chemicals of any kind used in your open space parcels?

No

Does your community currently have a management plan for the open space in the community

No

Does your community currently have a process in place to ensure that the open space will continue to be managed as open space once Taylor Morrison turns ownership over to an HOA?

Yes
