| • Evergreens | • Brush/Log Pile | |
| • Mature Trees | • Dead Trees/Snags | • Meadow/Prarie |
| • Dense Shrubs/Thicket | • Water Garden/Pond | • Burrow |
| • Host Plants for Caterpillars | • Cave | |

Controlling Exotic Species

- Use Native Plants

Soil and Water Conservation

- Reduce or Eliminate Lawn

Organic Practices

- Eliminate Chemical Pesticides
- Eliminate Fertilizers

Part 2: Open Space Specific Characteristics:**Wildlife and Plant Inventory Documentation**

- [Phase-I-ESA.pdf](#)

Please describe any notable parcels of open space or features of your open space - i.e. - a wash or river running through the property or a wetland / birding area.

This area is known as Windmill Park and consists of walking trails, a pocket park with picnic tables and a wet pond that is home to many species of fish, ducks and other water fowl. Most of the area is still in its native state however the walking trail is maintained by the HOA for the enjoyment of the residents. There are also several critical environmental features consisting of caves with endangered species that are protected.

What wildlife and native plants do you most frequently find in your community now? (NOTE - this is anecdotal, does not have to be a scientific study or exhaustive list)

Yaupon holly's, oaks, cedar elms, cedar and mountain laurels. Deer, rabbits, coyotes, snakes, possum.

Are any herbicides, pesticides or chemicals of any kind used in your open space parcels?

No

Does your community currently have a management plan for the open space in the community

No

Does your community currently have a process in place to ensure that the open space will continue to be managed as open space once Taylor Morrison turns ownership over to an HOA?

No
