Description

Dallas was our first division to install and certify a Nature Play Space. This unique playscape offers a diversity of play experiences for all ages and a blend of whimsical natural and manufactured equipment custom-designed for the space. This innovative playscape includes varied topography, a mix of play surfaces and unique and mentally stimulating features such as intricate climbing platforms, rope walls, multiple swing sets and slides. The progressive playground features elements fit for the youngest to oldest children in the neighborhood. Far from your average playground, it's a space where imaginations and little ones can run wild!

The Ridge also certified 64 acres of open space and a Monarch garden with plans to create more parks and monarch gardens throughout all five phases of development.
